INSPIRED BY NATURE

Natural, environmentally friendly materials such as wood, conglomerate and concrete in combination with unique colours to achieve an extraordinary effect in your bathroom.

Architectural concrete washbasins

Natural solutions for your bathroom. Concrete washbasins, thanks to their structure, are a kind of unique works of art. There are no two identical pieces, just as there are no two identical people, thanks to which products made of concrete gain their incredible, individual character. We are convinced that among the huge number of models and colours you will find one that will steal your heart.

Washbasin made with Terrazzo

New in our offer are washbasins made of terrazzo. In the production of terrazzo, among others, marble, granite and basalt are used, thanks to which it gains an elegant character. Depending on the type of aggregate, as well as the color of the cement, it can take on different shades. This material invented by Italians is characterized by extraordinary durability, resistance to impact or abrasion..

Conglomerate washbasins

A perfectly smooth surface without blemishes and a perfect shade of white are undoubtedly among the advantages of conglomerate. This durable material is also pleasantly nice and warm to the touch. Thanks to the casting method, this material allows us to obtain products with thin edges, sharp-edged
and unusual shapes which are not always possible with ceramics. The multitude of shapes gives a wide range of possibilities for both users and interior designers

Washbasin VENE
